Applicants : Ralf Benninger et al.  
Appl. No. : 10/691,356  
Filed : October 22, 2003  
For : METHOD AND APPARATUS FOR CARRYING OUT A TELEVISIT

MS Amendment  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

**FOURTH INFORMATION DISCLOSURE STATEMENT**

Sir:

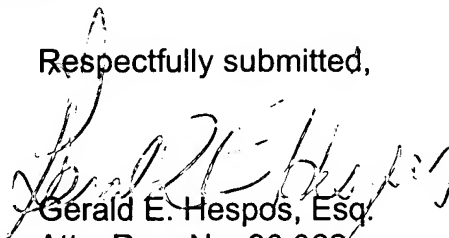

The above-identified U.S. patent application has a German equivalent. The German Patent Office issued an Office Action on February 23, 2005 in which the German Examiner cited WO 00/70303. The newly cited reference in the German Application has been listed on the attached copy of Form PTO-1449 and a copy of the reference is attached as well. The reference relates generally to an apparatus for three-dimensional surface profile imaging and measurement. The apparatus determines a three-dimensional profile of an object that is illuminated with light having a known structure. The structured illumination is projected onto the object from a point laterally separated from a camera. The camera then captures an image of the structured light pattern as reflected by the object.

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to:

MS Amendment  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450  
on March 2, 2005  
Hilda A. Abreu

The Examiner is requested to consider this reference during the examination and to make the reference of record.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Gerald E. Hespos", is written over the typed name.

Gerald E. Hespos, Esq.
